

MENLO PARK RECORDER

A PAPER DEVOTED TO THE BEST INTERESTS

OF MENLO PARK AND SAN MATEO COUNTY

Vol.

MENLO PARK, SAN MATEO COUNTY, CALIFORNIA, SATURDAY, JULY 11, 1925

No. 40

Incorporation Plans Discussed

A meeting was held last Thursday night in the club rooms of the Improvement Association in the interests of the incorporation of Menlo Park. While the attendance was not as large as was desired it seemed to be understood that there was not much that could be done at this time and therefore no need for a meeting.

F. S. Becker presided over the meeting and in opening stated the facts as they are and that the attorney engaged in the matter had secured an additional two weeks from the supervisors in which to finish the preparation of the necessary papers.

Mr. Harcom was called on and in a very brief and interesting talk told just what the boundaries were as established by the map adopted by the supervisors and went on to name the property owners who were excluded from the limits allowed and showed that many of them did not want to be left out of the corporate limits of the town when the incorporation was perfected.

Miss A. Emma Kimball was next introduced, and while she stated that she and her mother had but recently purchased property here they were both strongly in favor of incorporation. She gave many reasons why the city should incorporate.

It was stated that about 900 acres were included in the territory which the map adopted allowed Menlo Park for incorporation, while 1100 acres were embraced by the limits on the original map.

William J. Murray was asked if he could give the probable assessed value of the property sought to be incorporated and stated that it would be about \$750,000.

The estimated cost of running the municipal government after the city is incorporated is placed at \$6,000 a year, and it is thought that this will increase the tax rate very little if any.

The need of traffic regulation on the highway was stressed at the meeting by a number of speakers and it was shown that this would be one of the great advantages of incorporation.

There being nothing further to come before the meeting an adjournment was taken to Thursday, July 23d.

MRS. WILLIAM MOORE ENTERTAINS AT DANCING PARTY

A delightful party was given to a number of friends by Mr. and Mrs. William Moore who are soon to remove to San Francisco. The furniture was removed so as to provide a dancing floor and beautiful varicolored lamp shades formed the decorations for both the house and yard, which in addition to the light from the moon made things very pretty out of doors.

Each lady was provided with a yellow butterfly head band and the men were given red "shiek" hats with black tassels. Names for the "shiek" and "queen" were drawn and resulted in the selection of Jay T. Cooper as "shiek" and Mrs. J. H. Morris as the "queen". The other "shieks" chose their "queens" by choosing a hand extended from behind a curtain, which caused no end of fun.

Refreshments were served at a long table on the porch and the time was pleasantly spent in dancing.

Those present included: Mr. and Mrs. J. E. Cooper, Rev. and Mrs. Ralph Smith, Mr. and Mrs. Littner, Mr. and Mrs. Foy Rogers, Mr. and Mrs. J. H. Morris, Mr. and Mrs. Jay T. Cooper, Mr. and Mrs. Geo. Brown, Mr. and Mrs. J. Ryan, Mrs. B. Ragan, Mrs. Sue Chandler, Mr. and Mrs. Bert Ward, Mr. and Mrs. J. J. Garland, Miss Ryan and Mr. Werder.

Mr. and Mrs. L. Whitham of Oak Grove avenue have returned to their home here after a two week's vacation spent at their beautiful summer home near Los Altos. Mr. Whitham is interested in the shipping business with offices in San Francisco and Portland, Oregon. Sunday the Whithams entertained a number of guests in honor of the latter's sister, Mrs. Caroline McCloud.

MENLO PARK INCORPORATION ACTION LAID OVER TWO WEEKS BY BOARD

The matter of the proposed incorporation of Menlo Park was continued for two weeks at the request of counsel for the pro-incorporationists when the supervisors met last Monday morning.

The vote of the recent incorporation in San Carlos was canvassed by the board and it was announced that 157 votes had been cast for incorporation while 26 had been cast against the proposition. A resolution adopting the order declaring the municipality incorporated was then passed by the board.

A resolution declaring the result of the election in connection with the formation of the Dimond Public Utilities District in northern part of the county was adopted. Three directors at large were also elected.

The matter of the improvement of Walbridge street in the northern part of the county was taken up by Attorney Joseph B. Gordon. There were no protests and proceedings will be instituted July 20.

Soft drink permits were granted to the following: P. Lopez, Redwood City; Princeton Inn; Mrs. John T. Ralston, Memorial Park.

The applications of P. Howland, Willow Inn, near U. S. Veteran's Hospital; John Whelan of "The Box," Colma; and Nicholas Doukas, Colma Grill, were laid over.

District Attorney Franklin Swart was present at the meeting, having just returned from a vacation trip through the Canadian Rockies.

FOOD SALE TO BE HELD BY MISSIONARY SOCIETY

The Woman's Home Missionary Society of the Presbyterian Church is planning to hold a big food sale next Saturday in the building next to the Eagle Cafe on the Highway. The committee in charge, Mrs. M. Carter, Mrs. J. T. Aabel and Mrs. Jay T. Cooper announces that they will have a splendid array of foods for sale and assure the public of good values. The money will be used to further the cause of home mission work and it is hoped to add a neat sum to the treasury. Remember the date and place and save yourself the trouble of baking and cooking next Saturday. The sale is scheduled to start at 10 o'clock.

COUNTY PICNIC WILL BE HELD ON FOURTEENTH

Santa Clara County Consolidated will hold the next meeting at a big basket picnic in Big Basin next Tuesday, July 14th.

It is desired to have as many representatives from the different parts of the county as possible present and the party will leave Saratoga at 9:00 o'clock in the morning.

Arrangements have been made to close the road from Saratoga to the Big Basin for one way traffic only during three hours in the forenoon and three hours in the afternoon in order to facilitate the movement of the party both going and coming.

The supervisors and representatives from the various civic bodies of Santa Clara county will be the guests of Santa Clara County Consolidated at the picnic and the supervisors of Santa Clara County will also be present.

Saratoga Improvement Club has made arrangements to supply coffee for the whole party and it will be necessary for those going to take in addition to their lunch, something in which to get the coffee, and cups, knives, forks, spoons and other utensils as they may require.

Mrs. Edward E. Eyre who is passing the summer here at the home of Mr. and Mrs. Edward Lilburn Eyre entertained at a delightfully appointed luncheon on Tuesday. Those who enjoyed Mrs. Eyre's hospitality included: Mrs. Marshal Madison, Mrs. Frank Hooper, Mrs. C. La Montagne, Mrs. Joseph Donohoe, Jr., Mrs. Frederick St. Goar, Mrs. Herman Phleger, Mrs. Elmer Jennings, Miss Mary Emma Ford and Miss Isabel Jennings.

Louis Schelling of Atherton and owner of the California Trading Post was a business visitor in Mayfield on Tuesday.

County Valuations Greatly Increased

A tremendous increase in the assessed valuation of property in San Mateo county was shown by the assessment roll presented to the supervisors by Assessor D. P. Flynn this week. The total assessed valuation for the incorporated cities is \$24,077,360, an increase of \$3,196,500 over the 1924 assessment roll. The total valuation of outside territory amounts to \$18,073,010.

The town of Atherton shows the greatest increase, being assessed for \$1,350,875, which is \$925,105 more than last year. This large increase is due to the addition of strips of land annexed to the town during the year. Burlingame is second with a net increase of \$760,930. Redwood City is third with an increase of \$441,505 and San Mateo follows closely with an increase of \$440,375.

Hillsborough is the most valuable municipality, according to Assessor Flynn's roll, having an assessed valuation of \$5,140,600. Burlingame is third with \$4,595,600. The new town of Lawndale is the poorest community being valued at \$572,850.

The Third Township leads in valuation for the unincorporated territory being assessed at \$6,318,350 and is followed by the First Township with \$5,215,550 and the Second Township ranks third with \$3,545,340 valuation.

The figures as presented by the Assessor follow:

South San Francisco	\$2,250,850
Daly City	1,095,260
San Bruno	940,750
Burlingame	4,625,140
Hillsborough	5,140,600
San Mateo	4,595,600
Redwood City	2,580,330
Atherton	2,275,980
Lawndale	572,850

Total of cities	\$24,077,360
First Township	\$5,215,550
Second Township	3,545,340
Third Township	6,318,350
Fourth Township	1,890,270
Fifth Township	1,103,500

Total of Townships	\$18,073,010
Total value of county	\$42,150,370
Operative roll	\$2,115,450

Grand total \$44,265,820

ATTEND THIS BIG PALO ALTO SHOE SALE FOR BARGAINS

Ed Zwierlein's Walk-over Boot Shop in Palo Alto is offering an array of splendid shoes at special prices in a big July sale event and on another page will be found a detailed account of some of the bargains.

Included in this sale are men's, women's and children's shoes in a variety of styles and prices. A special sale of hosiery is also being featured including the wonderful Allen "A" hose for 89 cents. These hose are a wonderful value and guaranteed to give good service. Try them and see for yourself. An early call will be to your advantage.

TELEPHONE MANAGER TALKS ON "THE SYSTEM"

John D. Worthington, District Manager of the Pacific Telephone and Telegraph Company was a visitor at Mount Hermon last week where he gave an address before the Mount Hermon Association on "The Bell System, Its Aims, Purposes and Accomplishments."

Mr. Worthington's address which is an outline of the Bell System from the invention of the telephone and the early struggles of Dr. Alexander Graham Bell the inventor to gain recognition for his marvelous device to the present wide flung development of the system, has been given before a number of groups locally and elsewhere and has been productive of much favorable comment.

Mr. Worthington is considered an authority in his line and is an indefatigable worker for the advancement of his district.

Neat signs have been painted across Advance Lumber Company's office on the Highway and Ravenswood avenue. This addition is very pleasing and stamps the firm as another of the progressive merchants of the town with commendable civic pride.

Santa Barbara Quake Local

Assurances to the traveling public that the Santa Barbara earthquake was purely local and would cause no alarm to prospective visitors to San Francisco and other parts of California were broadcast throughout the United States by Californians Inc., a few hours after the news of the Santa Barbara disaster.

Dr. B. M. Rastall, manager of Californians Inc., addressed the following telegram to nearly a score of railroad traffic managers and heads of tourists travel bureaus in all of the larger cities of the United States:

"Would you kindly wire your agents and correspondents Santa Barbara earthquake purely local and has no relation to any active fault line nor indicates any further disturbance in opinion government and university geological experts. Shock not felt at San Francisco three hundred miles north, nor Northern California. Travel not interrupted and no damage outside Santa Barbara. J. M. Hill, United States Geologist for Geological Survey, San Francisco, on basis of newspaper reports expressed opinion. 'Shock purely local and should cause no alarm.' According to Dr. S. D. Townley, Stanford University, secretary, Seismological Society of America, Scientists predicted disturbance in Santa Barbara nearly two years ago and shock has no further implications."

Answering telegrams have been pouring in from railroad heads and executives of tourist travel bureaus, assuring Californians Inc., that their companies were telegraphing all of their agents and representatives of the situation as outlined by Dr. Rastall and that bulletins would be posted throughout America to quiet fear on the part of the traveling public.

"We have invested thousands of dollars in San Francisco and California tourist advertising campaigns this year," said Dr. Rastall, "and we took this step to prevent as far as possible any reduction in travel because of earthquake hysteria. Our telegrams were based on our own staff investigations in the office of the United States Geological Survey and a check up with seismological experts."

Dr. Rastall said that further measures will be taken if necessary to allay public fear in behalf of San Francisco and Northern California businessmen.

DR. JORDAN SPEAKS OF WAR INCITATION AS CRIME

Dr. David Starr Jordan spoke in the San Jose High school last Sunday on universal peace and said, "Every man who attempts to bring on war is a criminal."

"No nation was ever in the right in every quarrel, no nation was ever right in every many quarrels," he continued.

"It costs something like \$2000 to kill a man in war—it's cheaper to do it by automobile."

"I hate war above all other things because it is the one thing that is most dangerous to the world. Napoleon was the worst curse in the world's history. Killing men is not patriotism."

"If the nations of the world had a department of peace corresponding with their war and navy departments then we would accomplish our aims of world peace with no difficulty."

Among the guests of honor at the meeting were Torao Kawasaki, vice-consul-general of Japan stationed at San Francisco and Leo Mendez, representing the consul-general of Peru with headquarters at San Francisco.

Aspinall & Ryan's is a store which is packed full of quality goods for selection of local patrons. A complete line of quality hardware is also on hand for your convenience and it is by this means that this business has grown to its present ample proportions. Mr. Ryan is ever on the alert to make his store better. Owing to an over stock this firm is offering 3-4 inch electric hose for 20 cents per foot, which regularly sells for 25c. Now is your opportunity to get a good article at a big reduction.

WORTHINGTON EXPLAINS COMPILATION OF MATERIAL FOR PHONE DIRECTORY

"To most people the telephone directory is merely a place to find telephone numbers and addresses. Few people take into consideration the immense amount of detail and labor involved in the preparation of this book," said J. D. Worthington, Manager of the Pacific Telephone and Telegraph Company.

"The work in a directory unit requires extreme care and accuracy. The alphabetizing of listings in the telephone directory is probably the biggest 'alphabetizing' problem in the world, taken from a system wide view point."

"The printer's copy is prepared on what are known as 'Ad' sheets, on which the listing as it is to appear in the detail supplementary directory is typewritten. After the 'Ad' sheets have been typed, they are checked for accuracy and then forwarded to the printer. A manuscript is also maintained which is made up from the printed listings cut from page proofs of the last issued directory one column being pasted on each manuscript and are alphabetically arranged. Changes in telephone numbers or addresses on the printed pages are also kept on this manuscript. The work in the directory unit involves the checking of each listing six separate times for accuracy. A great amount of work and detail in connection with the compilation and printing of directories can be partially seen when you stop to think that there were over one hundred and thirty thousand additions and changes made in the printer's copy of a San Francisco and Bay Counties Directory in the six months period."

"The book goes to the printer and a copper plate, the most expensive plate used in printing, is prepared for each page. It is necessary to use copper for the lead alloy of which common type is made does not stand up and make as many impressions as are necessary to produce the directory. The book is printed in 'signatures' which comprise four, eight and sixteen or thirty-two pages. These are assembled in their order and go through a binding machine. The backs of these 'signatures' are cut by a revolving knife and the book then consists of single leaves held together. This is done so that when the book is finally bound it will open flat. Metal saws with tiny teeth roughen the backs so that when the glue is placed thereon the leaves will hold together. The cover is put on the books and a hole is bored in the corner completing the directory and making it ready for distribution."

"The delivery of the directory is itself a big job. The books are delivered by groups of men who are provided with delivery cards on which is shown the name and addresses and the number of books which he is to receive. House-to-house routes are followed. Upon delivery of the new book the old issue is collected to be removed from circulation. The old books are collected in order to eliminate confusion in the use of obsolete or wrong numbers, thereby maintaining the high standard of telephone service."

MRS. B. D. BUDWORTH DIES AT SANTA CRUZ HOME

Mrs. B. D. Budworth, wife of B. D. Budworth formerly interested in the Standard Publishing Company of Redwood City, passed away at her home in Santa Cruz following a long illness last Sunday morning. The deceased was a member of the Rebekah and Eastern Star lodges of Redwood City.

In addition to her husband, a son, Edward Budworth survives. Funeral services were held on Tuesday with interment at Santa Cruz.

Parents and children of the Menlo Park Circus Club gathered at the club house last Saturday for their annual program of sports. A horse race by some of the juvenile members was the main feature of the afternoon. A buffet supper was served followed by a motion picture show featuring pictures of circus events which have been staged in other years. An informal dance concluded the days festivities.

Report of County Horticulturalist

Following is the report of the County Horticultural Commissioner A. W. Tate, Jr., on file with the board of supervisors which will show the people of the county some of the splendid work being accomplished by this officer:

A number of plant diseases, due to seasonal conditions, have been reported during the month just passed. These have occurred throughout the state and have caused considerable damage in some sections, but have not proven very serious in this county except in a few cases. The diseases which have been most frequently called to our attention are as follows:

Peach Mildew
First frosty spots appear which soon turn brown and the affected skin hardens and cracks. The flesh may become tough and molds gain entrance through the cracks which may cause soft rots. Attacks have not been sufficiently severe to warrant any treatment other than cutting off the affected twigs.

Western Blight of Tomatoes
Western blight on tomatoes has been widespread and has caused considerable loss in some sections. The characteristics of the disease are rigid, downward inclined, branches, with brittle, yellowish-green leaves turned upwards at the margins. In the early stages the veins of the leaves are purple.

Good cultivation, with conservative irrigation will assist recovery of the plants. Those badly affected should be removed and burned.

Onion Mildew
A violet furry tint first appears upon the leaves which very soon turn yellow and the tops may collapse entirely. Soft rot may follow in the bulbs.

Bordeaux mixture (4-4-50 formula) with some form of "sticker," such as kaysol, will control this trouble.

Sycamore Diseases
Several complaints have been received regarding sycamore and plane trees. Two troubles have been encountered. First, a mildew which causes a downy growth on the leaves which later become discolored and die and second, anthracnose which turns the leaves red along the veins and causes them to drop.

Fungus Disease of Grapes
Spraying with Bordeaux, as recommended above, will help control mildew and excessive irrigation should be avoided. The second disease usually soon disappears of itself and new leaves are formed.

Considerable damage has been caused locally by a seasonal disease attacking grapes. Soft rot develops in the berry stalk which turns soft and brown, reddish brown spots affect the leaves and the berries turn dark and decay. This disease does not develop except under high atmospheric humidity so the recent warm weather has probably arrested its progress.

The diseases mentioned, with some minor ones, have been the occasion of over two hundred calls upon this office during the month.

The vegetable auction has been removed from Colma to San Francisco so inspection of potatoes has been temporarily discontinued. Four hundred and seventy boxes were condemned during June as "deceptive pack". This was less than one per cent of the potatoes inspected, showing that the majority of the growers are trying to observe the law.

But little planting of nursery stock is now going on, there being but 186 shipments received in June, 152 shipments of 4432 plants from within the state and 34 shipments of 5892 plants from the east. Total plants inspected, 10,324.

Respectfully submitted, A. W. Tate, Jr., Horticultural Commissioner, San Mateo County.

Fire destroyed the home of Mr. and Mrs. A. C. Jones near Valparaiso avenue here last Friday afternoon. It is thought that the blaze started from a fire left in the kitchen stove. The family was away at the time and the fire was discovered by a neighbor. The loss of approximately \$2,000 is covered by \$800 insurance.

Health and Home

FEEDING BABY DURING SUMMER

Milk is recognized as the ideal food for young children. It should be carefully guarded during the warm summer months, to insure its freedom from germs or bacteria that might cause harm to the child. Because of its nature, it is, under certain conditions, a breeding and propagating ground for germ life and may soon become unfit for use unless it is handled with the utmost care and vigilance. Perhaps the ideal way to obviate this risk is through the use of evaporated milk. This milk is only pure milk with sixty per cent of the water removed from it and is absolutely sterile. It is of double richness but may be modified by the addition of water, which will return it to its original volume with a greatly enhanced food value.

Evaporated milk is sterilized and has a high nutritive content. This causes it to be a very excellent food for the young child and the infant. In fact, many of the leading pediatricians of the country advocate its use after the child is deprived of its mother's milk. A formula, evolved by these pediatricians, through experimentation, is as follows:

From Sixth Week to Third Month.
Milk, evaporated 6 ounces
Lime water 2 ounces
Milk sugar 2 ounces
Bottled water 28 ounces
Seven feedings in twenty-four hours; 4 to 5 ounces at three-hour intervals during the day and four-hour intervals at night.

From Third Month to Fifth Month.
Milk, evaporated 7½ ounces
Lime water 2 ounces
Milk sugar 2 ounces
Bottled water 29½ ounces
Six feedings in twenty-four hours; 5 to 6 ounces at three-hour intervals during the day and a feeding at 10 p. m.

From Fifth to Seventh Month.
Milk, evaporated 10 ounces
Lime water 2 ounces
Milk sugar 2 ounces
Bottled water 30 ounces
Five feedings in twenty-four hours; 6 to 7 ounces at four-hour intervals, the last feeding to be given at 10 p. m.

From Seventh to Ninth Month.
Milk, evaporated 11 ounces
Lime water 3 ounces
Milk sugar 2 ounces
Bottled water 35 ounces
4 to 5 ounces at four-hour intervals during the day. Last feeding at ten at night.

From Ninth to Twelfth Month.
Milk, evaporated 12 ounces
Lime water 3 ounces
Milk sugar 2 ounces
Bottled water 34 ounces
4 to 5 ounces at four-hour intervals during the day. Last feeding at ten at night.

Trainer of Boxers Gives Diet Hints

To Kid Howard of Chicago and his new system of training and conditioning, Sammy Mandell, the present lightweight boxing champion of the world, gives a great deal of the credit for his meteoric rise to stardom to the world of pugilism. When Mandell first started boxing, he was just a weak and undeveloped, but after turning himself over to Howard it was only a short time before he took the decision from Sid Terris of New York that resulted in him being recognized as the boss of the lightweights.

Sammy Mandell, Howard's system is unique in that it works no hardship on the athlete who is in training. Unlike the systems that have been used for years, this prominent and successful trainer of men makes conditioning more of a pleasure than a distasteful necessity. Instead of demanding that his men eat only certain things he advises them to eat what they want and when they want it as long as it is cooked in a proper manner. Mr. Howard, in a recent interview on the subject of diet and condition, said, in part: "Years ago it was a task, and an unpleasant one, for a boxer or a wrestler to train for a bout because he was forced to literally starve himself unless he wanted to eat steaks and chops at all times. I remember that when I was training for a match, I was so truly tired of steaks that I choked every time that I ate one but it was steak or nothing. I advise my men to diet at all times but it is perfectly possible for them to diet and, at the same time, to enjoy their food. My only 'don't' is the one regarding the eating of such combinations as fresh milk and cheese, and fruit with cream. In fact, I advocate the use of evaporated milk entirely. Vegetables are fine and the more that the athlete eats the better he will be for it. Pastry, of certain kinds, such as homemade pies, cakes and cookies, if made correctly, and with pure butter evaporated milk and pure lard, are very beneficial. Steaks and boils are ideal. Taken as a whole, any food, with a few exceptions, is all right if properly cooked and eaten without gorging."

And one has but to look at Howard who is the most religious user of his own system, to realize that it is a success.

PALO ALTO ANNEXES MAYFIELD BY BIG VOTE

At the election held in Palo Alto last Thursday to determine whether Mayfield and Palo Alto would consolidate held in Palo Alto it was decided by a majority of better than two to one to consolidate and Mayfield is now a part of Greater Palo Alto.

The notice of consolidation has been recorded with the secretary of state at Sacramento and the work of taking over the administration of local affairs is going forward as rapidly as possible.

While it will probably take a week or two to complete this work and get things running smoothly the former officers of Mayfield are giving all the assistance in their power to help the work along.

The terms of office of the local officials automatically expired with the taking over of the reigns of government by Palo Alto officials.

WELL KNOWN SHINGLER SEEKS LOCAL CUSTOMERS

A. E. Warner, well known shingler is seeking trade through advertising in this paper this week. He has done a great deal of work in this community but thinks it wise to keep his name and telephone number before the public with his card in the local paper. If your roof leaked last winter, now is the time to have it repaired or reshingled. Call Palo Alto 2562-M and an expert shingler will be on the job and will give you quality work at a reasonable price.

The Ravenswood Chamber of Commerce will meet on Monday evening, July 13 in the school auditorium at which time an entertainment will be presented and refreshments served.

For Sale—Two tent frames with flooring, nearly new, sizes 9x12, price \$15. Call at 531 Cooley avenue, Ravenswood in rear.

POLICE GATHER IN SIX CHINESE FOR GAMBLING

Last Monday the police raided the Mayfield Chinatown and gathered in six Orientals on a charge of gambling.

Wong Hong Lee, proprietor of the raided joint was freed on \$500 cash bail by Judge E. D. Lakin. The case will be contested in court. A quantity of liquor was found in the place. Ong King, who was arrested at the same time was found to have a loaded revolver on his person and was fined \$25. Lee Chee, Dong Cree and Ah Joe were fined \$10 for being visitors at the place and Walter Tom was dismissed when it was shown he was not playing.

The Bayside Canning Company's plant here opened for the season Wednesday morning with a large crew of workers which will be increased from time to time as the crop comes in for preserving.

MRS. WYMAN HONORED BY FRIENDS' ON ANNIVERSARY

Mrs. B. Wyman of Mayfield was the guest of honor at a delightful barbecue and picnic at the home of her daughter, Mrs. Frank Molarius at Stevens Creek last Saturday in honor of her birthday anniversary. A delightful barbecue lunch was served and the balance of the day was spent in games and dancing.

Those who attended were: Mr. and Mrs. A. B. Wyman, Miss Geraldine Ravallier, of San Jose; Mr. and Mrs. Phil Rogers, Miss Anita Rogers, Miss Etta Clark and Miss Adeline Clark of Redwood City; Mr. and Mrs. Peter Gutierrez of Watsonville; Mr. and Mrs. D. Lopez, Miss Virginia Lopez, Eddie, Peter and David Lopez of Cupertino; Mr. and Mrs. Ben Wyman and Clarence Wyman of Mayfield; Miss Gertrude Clark and Miss Ada Driven of San Francisco; Misses Thelma and Constance Molarius, Arthur and Francis Molarius, Jr.

DUMBARTON GRANGE ENTERTAINS AT CHICKEN DINNER

The Dumbarton Grange entertained guests from Gilroy, Mountain View, Campbell and San Jose, at a chicken pie dinner Monday evening at the Ravenswood school auditorium. Covers were laid for 192 and the dinner was a splendid success.

"The Marriage Proposal," a humorous play was presented following the banquet and was much enjoyed by the guests.

A large class of candidates was given the third and fourth degrees conferred by the Mountain View degree team under the leadership of Miss Anna Gerrals. William R. Dilly, master of San Jose; George Miller, master of Mountain View and E. K. Clendennin, deputy grand master, addressed the Grange following the degree work.

By R. W. KING

ON the basis of the communication art as it exists today, the most promising method of achieving commercial transatlantic telephony is by radio. It is well to start out with this observation because after all there is, in the nature of things, no assurance that ultimately this service will not be rendered by wire (for example, by submarine cable) rather than by radio.

The transmission of the voice across the Atlantic is now no new thing. In fact, it was first accomplished almost exactly ten years ago by the engineers of the American Telephone and Telegraph Company. It was followed by extensive one-way tests in 1923 by the same engineers. More recently many amateurs, both here and abroad, have received broadcast speech and music across the water. This situation may at once bring to the minds of many readers this question: Why is it, if the waves of the various broadcasting stations have penetrated across the Atlantic and been successfully heard on amateur receiving sets, that the problem of engineering commercial transatlantic telephony service is difficult and involved?

Atmospheric Conditions

The answer to this question lies in the profound influence which atmospheric conditions exert upon the transmission of radio waves. If there were no such thing as the noise of static to interfere with signal reception, and if the absorption of waves by the atmosphere were a definitely fixed and predictable quantity, the institution of transatlantic telephony would be a comparatively simple matter. But unfortunately these very desirable conditions seldom, if ever, obtain. In fact, within a period of a few hours, atmospheric conditions may change so greatly that an increase of the transmitting power by a factor of 10,000 is required to drive through intelligible signals.

It will be borne in mind that successful amateur reception occurs only for very brief intervals and then only under the most favorable conditions. The requirements imposed by a commercial telephone service are rigid, not only because satisfactory communication must be provided any hour of the day and any day of the year, but also because the transatlantic radio telephone must operate in conjunction with the telephone wire lines, both in this country and in Europe. In other words,

the radio service is but a link in a longer telephone circuit. Thus, when a subscriber calls from New York or from some inland city his voice will travel by wire to the radio station on the Atlantic coast, thence by radio to the transatlantic receiving station, from which point it will again travel by wire to the person who is being called. During conversation the primary question is whether or not each subscriber can understand and be understood. This means that the transmitted sounds must be of sufficient loudness and also must be intelligible.

Ether Channels

At the basis of the engineering of transatlantic telephone service must lie, therefore, very extensive knowledge of the vagaries of static and radio wave absorption. For a period of over two years, telephone engineers in both the United States

and England have co-operated in obtaining the necessary data. The observations thus far made number over 40,000 and relate primarily to the relation between time of day and day of year to the strength of radio signals, amount of static noise and telephonic intelligibility. The wide variation in all of these must be overcome in providing transatlantic telephone service. In this country the work has been carried on by the American Telephone and Telegraph Company and the Bell Telephone Laboratories with the assistance of the Radio Corporation of America, and in England the International Western Electric Company and the British Post Office have been jointly engaged.

In Fig. 1 is illustrated typical measuring apparatus by means of which the strength of incoming sig-

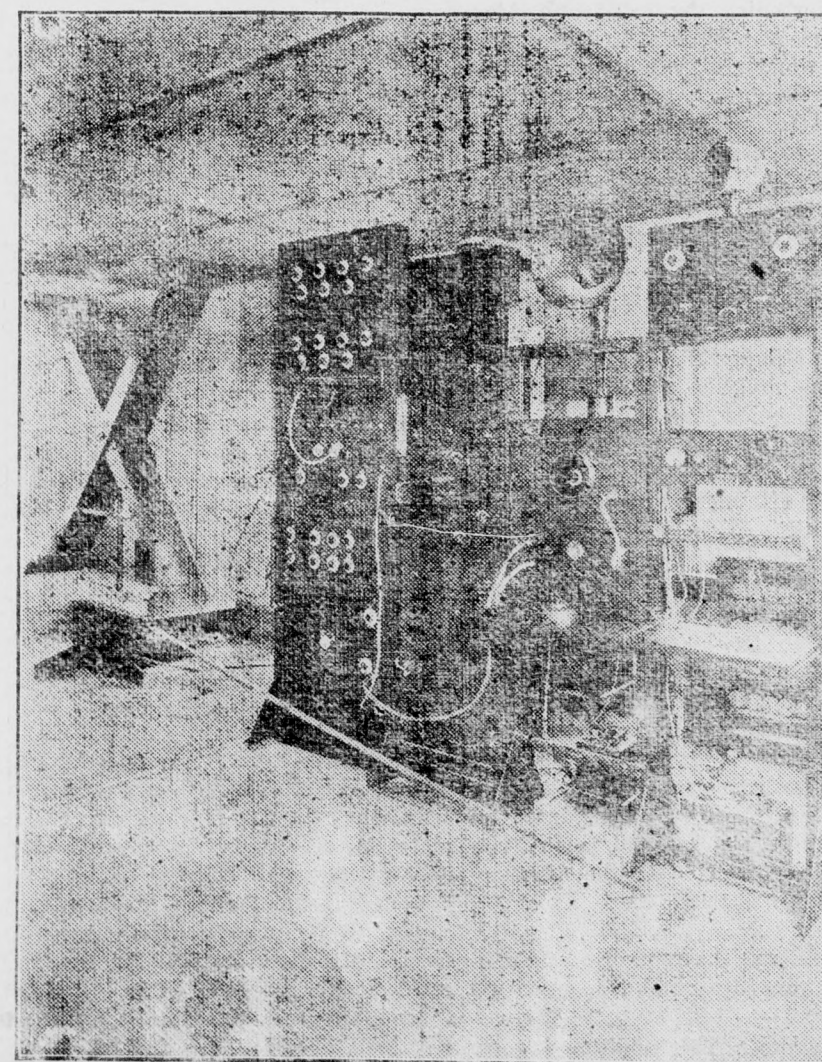

Fig. 1.—Interior of Transatlantic Radio Receiving Station, Riverhead, L. I. Loop Antenna at Left, Receiver, Set and Measurement Apparatus on the right.

nals and also the strength of static interference is being determined. The apparatus shown in Fig. 1 is located at Riverhead, Long Island, and similar sets have been in operation at Belfast, Maine, and New Southgate and Chedzoy, England. The radio signals and noise are picked up on the large loop antenna shown on the left hand edge of the picture and their intensity is determined by comparison with a known voltage introduced directly into the loop from a local oscillator.

The following interesting information is taken from an analysis of the above mentioned observations by Messrs. Espenschied, Anderson and Bailey of the American Telephone and Telegraph Company.

Test Measurements

The wide variations in radio signal strength for transmission across the Atlantic are striking in several particulars. The measurements again point out the now well-known fact that during the day transmission is consistently poor and at night the transmission is much better. The poorest transmission of the day occurs a few hours before sunset in New York. At the time sunset prevails, somewhere on the Atlantic there is a marked and consistent decrease in signal strength usually referred to as the sunset dip. Following this there is a steep rise to night transmission values and the signal strength remains at a maximum for four or five hours.

Origin of Static

As was to be expected, the static noise was found to be much greater in summer than in winter. Furthermore, the study of noise points to interesting conclusions as to the geographical region in which static originates. An analysis of the records indicates that most of the noise in England comes from equatorial Africa, and in America static is likewise of tropical origin. Static, nature's radio system—as well as man-made radio—is affected by day and night conditions. Figures 2 and 3 depict the earth with one hemisphere in darkness and the other in light, the sun being imagined on the left. Since daylight transmission is much poorer than night time transmission, the amount of static noise in England is at a low level while daylight conditions prevail over England and Africa as shown in Fig. 2. The static picked up in England is least some time before sunset, as indicated by the arrow on the noise

curve. As the earth rotates from left to right and the region of sunset moves across to America and the imaginary line separating day and night moves around the earth to the left, darkness comes over the regions in question as shown in Fig. 3. The waves of static can now penetrate through to England without marked absorption and the noise level reaches a high value, indicated by the arrow, which continues high while complete darkness prevails.

A further important result was found as regards the distribution of power in the static waves. Nature broadcasts on many wave lengths, that is, static consists of 100 meter, 200 meter, 300 meter and on up to and above 1000 meter waves; in fact, static consists of a wide band of wave lengths just as white light consists of a wide band of colors with infra-red waves within the red color and ultra-violet waves beyond the violet color. Just as most of the energy radiated from an incandescent lamp is in the long heat waves, or so-called infra-red waves, so most of the power of static was found in the long electric waves far greater in wave length than those now used in radio broadcasting.

Transmission Tests

Telephonic intelligibility tests were carried out by speaking a series of entirely unrelated words so that there was no possible way to aid correct reception by understanding the thought of the context. Such tests are severe and the percentage of words understood varies widely during the hours of the day. When complete darkness prevailed over both England and the United States the percentage was frequently 100. At the time of poor transmission, the percentage dropped to something below 40 per cent, and at that time when sunset prevailed on the Atlantic Ocean, percentage was occasionally zero.

The achievement of commercial transatlantic radio telephony is within the realm of probability. The extremely variable character of the many factors involved must, however, be first overcome. A negative result in a particular test, as far as successful transatlantic conversation is concerned, does not mean that it cannot be done; it means that at the particular season of the year and under the conditions of the test, it could not have occurred. In the tests above men-

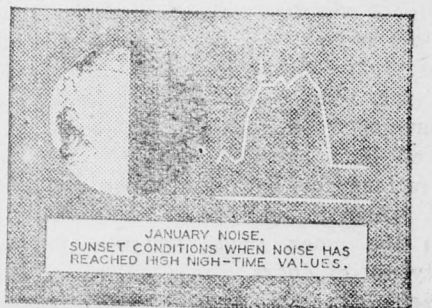

Figure 3

tioned, as much as 68 kilowatts of power have been delivered to the antenna. Results indicate that at times greater power than this would be necessary for satisfactory commercial service. Tests are now in progress in which power well in excess of 100 kilowatts of power is delivered to the antenna, and correspondingly better reception is being obtained.

Earth's Magnetism

Another of the interesting results of the analysis of the thousands of individual observations is evidence that unusual disturbances in the

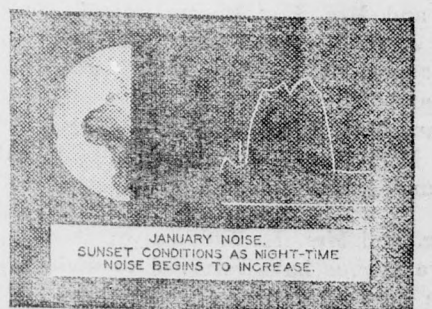

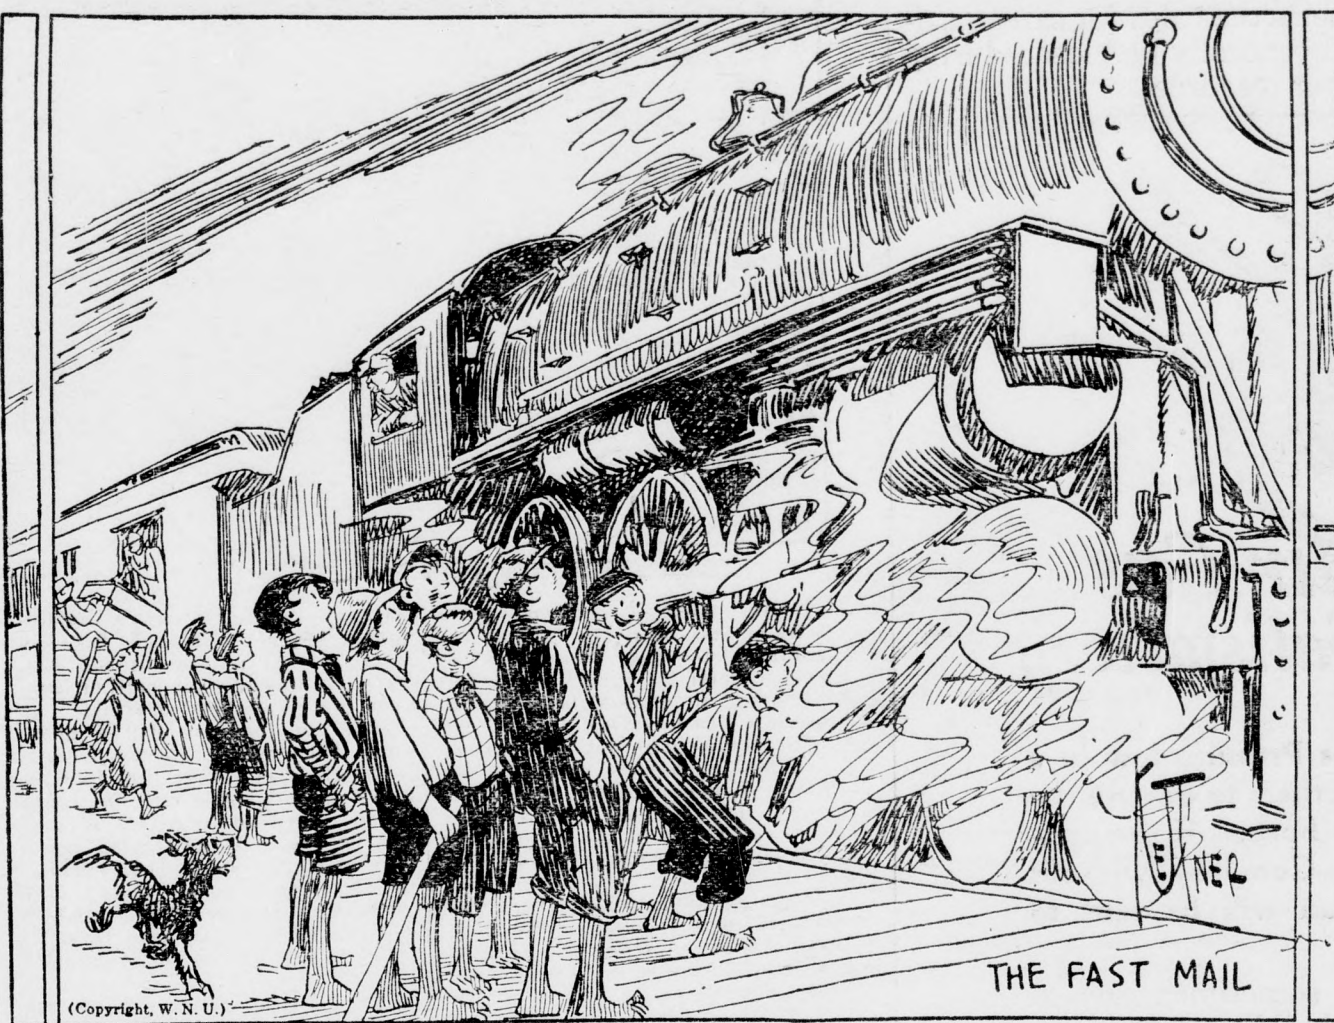

Figure 2

ether's magnetic field definitely affect radio transmission. During such disturbances the nighttime field strength is greatly decreased and the daytime values are slightly increased.

CALIFORNIA NEWS BRIEFS

For the state of California, the number of income tax returns filed in 1924 was 517,109, which showed net income amounting to \$1,714,581,490, and tax, \$40,254,388, the number of returns and net income being the largest for any year. As compared with the preceding year, the figures for the United States show an increase of 910,840, or 13.42 per cent in the number of returns filed, an increase in the total net income reported amounting to \$5,009,125,313—or 23.43 per cent, but a decrease of \$157,095,143, or 18.24 per cent in the total tax. For California the increase in the number of returns was 96,186, or 22.85 per cent, the increase in the total net income amounted to \$357,056,969, or 26.30 per cent, and the decrease in the tax was \$3,524,544, or 8.05 per cent.

An order for John F. Johnson, state superintendent of banks, again to appear before a notary and give his deposition in connection with the Valley Bank of Fresno case was issued by Presiding Judge Fitzpatrick of the superior court on the application of C. D. Dudley, attorney for Mrs. Maude James Loller, who claimed new information made it necessary to question Johnson again before Mrs. Loller's suit can be prepared for trial.

Daniel Damion, star witness in the prosecution of George Alvia for the murder of Charles Conroy, wealthy stockman, whose escape from the Butte county jail three years ago put a halt to the trial and brought about Alvia's dismissal, was captured at Gardnerville, Nev., by Butte county officers and brought back to Oroville. The grand jury will have an opportunity to indict Damion on a charge of breaking jail.

Justice William P. Lawlor of the state supreme court has threatened to start a suit to test the right of the state board of control to pass upon the expense claims of members of the court when sessions are held away from San Francisco. Recently \$25 was blue penciled from their claims because Justices Lawlor and Seawell rode from San Francisco to Los Angeles in Justice T. J. Lennon's automobile.

That John H. Worthington, "the wolf of La Salle street," accused of the theft of \$100,000 in securities from the firm of S. F. Ballentine & Company, Los Angeles, of which he was a member, has escaped from the custody of Mexican authorities at Ensenada, Lower California, and is probably now on his way to Europe, is the theory held by his San Diego friends, who attempted to get in touch with him.

The design of miner and bear for the souvenir 50-cent piece authorized by congress to commemorate California's Diamond Jubilee has been approved by the United States Treasury department. The souvenir coins will be minted in San Francisco as soon as the necessary dies are made and will be distributed through members of the San Francisco and Los Angeles clearing houses.

Renewal of the war between rum runners and hijackers, which has taken a toll of dead and injured, is thought responsible for the death of Walter Dunne of Boise, Idaho, whose dead body was found beside his automobile filled with whisky and gin, on the San Juan grade between Hollister and San Juan. The body was identified by a draft registration card.

An ancient Indian graveyard, believed to antedate the California mission period, was discovered recently at the Purissima mission, in the Santa Ynez valley, near Santa Barbara by research workers. A number of prehistoric specimens, including several Indian skeletons, skulls, beads and arrowheads were obtained.

Fifty-five school teachers of the south, mostly from North and South Carolina, were the guests of the Sacramento chamber of commerce in a tour of the city and its historical points of interest. The teachers were members of the annual Edgerton tour of the Pacific coast, organized in Greensboro, North Carolina.

Grove L. Johnson, father of Senator Hiram W. Johnson, has retired as receiver of the Sacramento federal land office and was succeeded by John C. Ing, at present registrar, who under the economy plan of President Coolidge, will be both receiver and registrar.

Fifteen federal officeholders are out of jobs in San Francisco as the result of the abolishment and consolidation of various posts under Coolidge economy.

Randsburg experienced a cloud-burst and earthquake, in which the whole mining camp was endangered. Mud and boulders swept over the main streets of the camp and traffic was almost impossible.

B. R. Kratzer, 75, of Buena Park, was found wandering in Bloomington, Ill., apparently a victim of amnesia. His appearance bore out his claim that he had had nothing to eat for three days and no place to sleep, although he had plenty of money in his pockets and a ticket to California. He claimed a married daughter at Palmdale.

Large trees were uprooted, several wooden structures overturned and a number of houses unroofed by a heavy wind storm at Yuma. Damage, estimated at \$3,000, was done to the pipes of the ice company plant.

Sacramento received her first air mail delivery July 1.

Watsonville's \$90,000 school site bonds carried by 4 to 1 vote.

Compulsory vaccination of dogs against rabies is effective in Fresno.

R. M. Litchfield, Watsonville native, lost his life in the Santa Barbara quake.

Percy Walker, San Francisco, was elected vice-president of the American Automobile association.

Madera will have a new railroad station and freight shed on the Southern Pacific reservation.

A reported oil strike in the test well near Jasmine started a rush of lease seekers into the new area.

Editor Walter H. Killam, Merced Star, has been appointed private secretary to Senator Hiram Johnson.

No increase in the present wage scale will be asked by the building trades union during the reconstruction period at Santa Barbara.

Castle Rock, a shore line sentinel of Santa Barbara beach, familiar to residents and visitors, was swept to the ocean bottom by the earthquake.

S. M. (Shady) Myrich, once a resident of Death Valley, and a figure of note in the nation's mining industry, died at Leadville, Colo., from paralysis.

Fire swept away a block in the business section of Lakeport, destroying six frame buildings and damaging others. The loss is estimated at \$20,000.

Charles Bowser, 41, was drowned in Stillwater creek, four miles east of Redding, where he was employed in a pole line camp. He went to the pool to wash some clothes.

Women who leave homemaking to become wage earners must pay alimony to support their minor children, a San Francisco superior judge ruled in granting a recent divorce.

Mrs. Otto Elgert and young daughter of Los Angeles were instantly killed at Grants, N. M., and a 15-year-old son critically injured when their auto was struck by a Santa Fe train.

Returning from a two days' absence, William Blagrove entered his cabin in Trinity county, on the Trinity river, and found four deer contentedly licking the salt from a pan on the kitchen table.

The closing of the registration period of the University of California summer session with an enrollment of 5,039 indicated that the total number of students will fall far short of the 5,500 expected by university officials.

The sentence of Charles F. Dillon, former city finance commissioner of Fresno, has been set at four years. Dillon was convicted on eleven counts of falsifying public accounts. The various sentences will run concurrently.

Petitions were filed in the United States district court at Sacramento for an order authorizing the destruction of nearly 60,000 gallons of wine seized in raids on five wineries in northern California by the federal officers.

"Godless education" taught at the University of California is charged by Mrs. Olva Baker with responsibility for the extortion plot in which Bliss Baker, her son, is involved in connection with the kidnapping of Mrs. D. C. Jackling of San Francisco.

W. S. O'Brien, editor of the Marysville Democrat for years, and associated at various times with other newspapers in the Sacramento valley, has been chosen secretary of the Yuba county chamber of commerce. He will assume his duties on July 12.

Holger Carlson, 36 years old, rancher of the Eastern district, southwest of Madera, slashed the throats of his two sons, Billy, 4 years old, and Allen, 2 years old, and stabbed himself in the breast and throat and then slashed his throat. All are dead.

M. H. Whittier, Los Angeles capitalist and pioneer southern California oil operator, died at a Redlands sanitarium, aged 57. He was one of the organizers of the Associated Oil company and was heavily interested in the Los Angeles Steamship company, several banks and the Rodeo Land and Water company, developers of the suburb of Beverly Hills.

Identity of the woman who was killed with John L. Richardson, Los Angeles attorney, by an avalanche in the high Sierras, twenty miles above Kernville, was established as Mrs. Cora Elizabeth De Silva, wife of Fred De Silva of Texas. The bodies of the two victims, who were members of a week-end fishing party of six, were found buried beneath tons of rock.

The state board of forestry has entered into a 5-year agreement with the Central Pacific Land company for the protection against fire of over 200,000 acres of timberland owned by the company in six counties. Similar agreements in the past have been on a yearly basis. The counties included in the agreement are Siskiyou, Shasta, Trinity, Tehama, Butte and Yuba.

The California Transportation company, for fifty years operating freight and passenger steamers on the Sacramento river, recently secured from the secretary of state a 50-year renewal of contract. The company was organized in August, 1875, and has been in operation since.

The annual value of California's lumber and lumber products now amounts to \$170,000,000, the state ranking fifth in the quantity of lumber produced in the United States; third in the number of people employed in the industry, and second in the value of the product.

A REAL "SERVICE" INDUSTRY

Franklin T. Griffith, president of the National Electric Light Association, in an address at San Francisco said that the light and power industry in this country last year attracted some \$400,000,000 new capital from the investing public and that total number of investors in light and power securities today is close to 3,000,000.

"The light and power industry of United States," said M. Griffith, "will need to raise money at rate of \$2,000 every minute for next ten years. It will require \$10,000,000,000 to meet financial demands of the industry during the coming decade, and this stupendous task presents one of outstanding problems of the industry. It is most gratifying that the public is coming to our aid in ever-increasing volume and numbers.

"The expansion in the industry the last year has been tremendous. Light and power companies were called upon to increase their productive capacity to nearly 54,000,000,000 kilowatt hours, and if the present ratio of increase continues, 1925 will register a volume of output close to 60,000,000,000 kilowatt hours."

UNDERMINING CONSTITUTIONAL GOVERNMENT

As to the possibility of reducing the overhead cost of the Federal government in years to come, President Coolidge made the following clearcut statement:

"Unfortunately the federal government has strayed far afield from its legitimate business. It has trespassed upon fields where there should be no trespass. If we could confine our federal expenditures to the legitimate obligations and functions of the federal government, a material reduction would be apparent. But far more important than this would be its effect upon the fabric of our constitutional form of government, which tends to be gradually weakened and undermined by this encroachment."

No weightier, no wiser words have come from the White House in many years.

IMMORTALIZED THE PIONEERS

The newspapers of the United States are handing compliments to the late Herbert Quick who has passed on from his brilliant career as a fiction writer to the realm of the unknown.

He was to Iowa and the Middle West such a chronicler of its true life as was the late Emerson Hough, who wrote "The Covered Wagon" and immortalized the conquerors of the Far West.

Both Hough and Quick were all-around Americans and sympathetic with the struggles of the pioneers who made this nation a reality.

Their stories are clean as the winds of the Iowa prairies, wholesome and invigorating as the lives they depict, leaving no excuse for reproducing degenerate literature for American families to read.

Her Beautiful Eyes

James Whitcomb Riley

Her beautiful eyes! they are blue as the dew
On the violet's bloom when the morning is new.
And the light of their love is the gleam of the sun
O'er the meadows of Spring where the quick shadows run
As the morn shifts the mists and the clouds from the skies—
So I stand in the dawn of her beautiful eyes.

And her beautiful eyes are as mid-day to me
When the lily-bell bends with the weight of the bee.
And the throat of the thrush is a pulse in the heat,
And the senses are drugged with the subtle & sweet
And delicious breaths of the air's lullabies—
So I swoon in the noon of her beautiful eyes.

Her beautiful eyes! they have smitten mine own
As a glory glanced down from the glare of the Throne;
And I reel, and I falter and fall, as afar
Fell the shepherds that looked on the mystical Star
And yet dazed in the tidings that bade them arise—
So I grope through the night of her beautiful eyes

Copyright, 1925, The Ebbel-Merrill Company

PROTECT THE FORESTS

Fires are already breaking out in the hills. The duty to sow no seeds of fire is on everyone. It falls particularly on the vacationists now swarming the woods. The experienced outdoor man grinds tobacco leavings and match stubs into the dust with his heel.

The campfire should be built only on bare ground, should never be left unattended, and should be thoroughly extinguished before the camp is left. The forests will be open as long as the public respects the rules for safeguarding them, otherwise they will eventually be closed during the summer to protect our timber resources.

want your Gas
Service to be Satisfactory

If you notice the Gas Pressure low in a particular burner, light others to be sure the fault is not with the first burner. If the pressure is poor notify the Company without delay and a service man will be sent to remedy the trouble.

Lack of pressure is sometimes due to improper piping. Many buildings are piped for limited use of Gas and low pressure results when the number of appliances is increased.

Low pressure is very often due to clogged house pipes. When the Gas service man discovers this condition, it is sometimes possible for him to clear the pipes, and he will do this whenever possible. If necessary, he will advise you to call a plumber.

Water Nymphs Flash Bare Limbs on Season's Fashionable Beaches

ANNA Q. NILSSON
AND BEN LYON
ON THE BEACH

NEW YORK—From snowy and slightly growth. Zipped for her bathing stockings, according to Mme. Berthe, superfluous hair specialist in a talk here on the season's beach styles.

"Stockings will not be worn by fashionable misses who parade their shapeliness on the sunbaked sands this summer," said Mme. Berthe. "To be in the swim when swimming, bare legs are the thing."

"But bright sunlight is trying on bare limbs. The least flaw in the skin becomes a scar. A night's exposure of down is grotesque. Hair softness seems a mark of the past. The maid afflicted with it must undergo a painful process of removal."

"So to be correct on the beach this summer a girl must be stockinged, zipped and rubber-sandaled. Now she unmasks her contours to the sun."

"But her feet are still a problem. The most beautiful women have ugly feet. Feet that look so dainty and aristocratic in high-heeled shoes of polished leather usually are deformed with corns and twisted toes. The bathing nymph must hide her feet and to hide them fashionably, she must do it in rubber sandals easy to wear and look at and as imponderable as this life down."

"So to be correct on the beach this summer a girl must be stockinged, zipped and rubber-sandaled. Now she unmasks her contours to the sun."

Mrs. Emma Duncan left Tuesday evening for a vacation trip to Los Angeles.

The Woman's Home Missionary Society of the Presbyterian Church met in the church parlors Thursday afternoon with Mesdames Webb and Walker as the hostesses. Mrs. E. Gardner had charge of the program which consisted of a synopsis of the work being accomplished in the various fields. Refreshments were served.

Mr. and Mrs. C. La Montagne and two daughters of Atherton left Monday for a vacation trip to the Feather River Inn. They expect to visit Lake Tahoe before returning.

Mr. and Mrs. Charles Dunphy entertained a number of their friends at an informal buffet luncheon at the Menlo Park Country Club Sunday afternoon.

Order your job printing from the Menlo Park Recorder, Phone 268-J.

Frank E. Lee, treasurer of the Menlo School for Boys is at Lake Tahoe this week on an inspection tour of the summer school camp being conducted there. He will return to Menlo early next week.

Mr. and Mrs. John Heltzel are back from a visit with relatives in different parts of the state and have booked passage on the steamer, Finland which is to sail from San Francisco to England via the Panama Canal on Saturday, July 18.

Mr. and Mrs. J. B. Gladstone and Mr. Gladstone's mother who is visiting this section and who lives in New York, will be visitors here over the week end. The Gladstones are spending some months at Asilomar.

Mr. and Mrs. A. E. Thomas and family are now occupying their new home here. The item in last week's paper regarding their trip to Canada was an error on the part of the Recorder reporter.

**COUNTY SQUAD TO START
HEADLIGHT RAIDS MONDAY**

According to advice from Captain Jack Pacheco of the Santa Clara traffic squad, next Monday evening will mark the beginning of raids on illegal, defective and glaring headlights. Particular attention will be paid to glaring headlights, it is stated, which are credited with causing most of the automobile smashups after nightfall. The raids will be conducted on Monday, Wednesday and Friday evenings in different parts of the county and will extend over a period of several months. Inspector Fred Vallejo of the state motor vehicle division will assist the local state traffic squad in carrying on the raids.—Mayfield News.

Mr. and Mrs. H. H. Bearce are now occupying the Presbyterian parsonage on Santa Cruz avenue.

Mr. and Mrs. W. H. Johnson of Burbank, parents of Mrs. F. P. Bush, spent the holidays here visiting at the Bushey home on Glenwood avenue.

According to the best information obtainable a dollar will go farther at McLoughlin's Shoe Store here than elsewhere. Try your home dealer first, you will be surprised at the service and prices. Expert shoe repairing also done and at prices that are bound to please.

Miss A. Emma Kimball and her mother, Mrs. Ariadne Kimball recently purchased a home here on Valparaiso avenue. Miss Kimball will soon be marketing a fine line of jams and jellies under the brand of the "Silver Moon". She is famous for these articles.

Mrs. Florence Faxon was hostess at a delightful dinner dance last Saturday evening at the Menlo Park Country Club. Those present were: Mr. and Mrs. Browning Smith, Mr. and Mrs. Alexander Isenberg, the Misses Elsie Faxon, Geneva White, Helene Lundborg, Ellenita Rawlings, Dorcas Jackson and Hazel Montague; Messrs. Clift Lundborg, Frank Sutton, Frank Fuller, John F. Brooke, Jr., Lalor Crimmins, Burbank Sommers, George Wheaton, John Aiken, Pardow Hooper and Russell Macdonald.

The July Sale is On

ED **ZWIERLEIN'S**
Walk-Over
BOOT SHOP

With summer days at hand comes Zwierlein's Annual July Sale. A big event for every member of the family. You will appreciate the values we are giving. Frankly, many cost more than we are selling them for. Come in today and select from a myriad of patterns. We stand back of every pair of shoes sold, and make charges gladly.

Ladies' Specials

\$5.80

This group includes values to \$12. The latest models from Walk-Over in white kid, patent, satin, and tan calf. All heels and patterns.

\$4.80

In this group are values to \$10. Included are the various popular leathers in smartly styled pumps and oxfords, from Walk-Over.

\$3.80

This group includes values to \$9. A good array of correctly styled straps and pumps for the summer season, in all leathers.

\$2.80

Included in this group are values to \$8.50. Mostly broken lines, but worth a great deal more than the price.

\$1.80

Broken lines and some odd sizes. A splendid bargain if we have your size.

Men's Specials

\$5.80

These shoes were formerly priced to \$10. Included are the smartest kicks of the season. Crepe sole oxfords in Scotch grain, two-tone sport, plain toe, tan or black calf. Also high shoes in black or tan. All are deeply reduced.

\$4.80

These shoes sold to \$8.50. They include oxfords and high shoes, in tan and black. They're mighty good looking, and the price is easy.

\$3.80

The lines were broken, so we broke the prices. Included are handsome models with lots of dash.

Youth's Tennis 95c

Durable speeder and hummer balls deeply cut. Sizes from 11 to 2 and 2 1/2 to 6. Proportionate reductions in all leather shoes for youths and boys.

Sensational
\$1 Special

Comes once a year, includes white straps and oxfords.

Also all other leathers.

You'll want more than one pair.

They're on the racks.

Pick 'em off.

Prices Slashed on Children's Shoes

Thirfty mothers will take advantage of this drastic reduction. Some at half price. Investigate.

A Review of California Conditions from
WELLS FARGO BANK & UNION TRUST CO., SAN FRANCISCO

CALIFORNIA—Considerable rain fell in California during the latter half of May and the first week of June. The latest rains were decidedly variable in amount, but the greatest quantities fell in southern California, where at some stations precipitation exceeded two inches. Snow fell in the mountainous regions.

The late rains damaged strawberries and cherries. Some early sown grains were badly lodged and some other crops retarded, but on the whole the agricultural situation was improved. Condition of leading crops on June 1 was reported by the agricultural statistician, Sacramento, as follows:

WHEAT

The area to be harvested for grain this year is estimated at 546,000 acres, and a total production is indicated of 10,428,000 bushels. Last year approximately 318,000 acres of wheat were harvested for grain, producing a crop of 4,770,000 bushels.

OATS

The preliminary estimate of the area of oats to be harvested for grain in California was 157,500 acres, or 225% of the acreage harvested for grain in 1924.

BARLEY

The condition of barley was 90% of normal on June 1, compared with 57% last year, and a 10-year average of 80%.

APPLES

Prospects for the apple crop are comparatively poor in the Watsonville district and unusually poor in the Gravenstein sections of Sonoma and Napa counties. The condition of the crop was estimated at 50% of normal on June 1, compared with 75% last year and a 10-year average of 78%. This is the lowest condition of the apple crop ever reported in California on the first of June.

PRUNES

The prune crop was estimated at 68% of normal on June 1, compared with 68% last year and a 10-year average of 76%. With the exception of the San Joaquin Valley districts, the crop is generally light, but reports indicate that prunes are sizing up very well.

PASTURE

The June 1 condition of pasture in California was 99% of normal, compared with 55% last year and a 10-year average of 82%.

ALFALFA

A slight increase is indicated in the acreage of alfalfa this year as compared with 1924. A preliminary estimate shows 1,021,000 acres—an increase of 20,000 acres. Condition of the crop on June 1 was estimated at 100% of normal.

LIVE STOCK

Exceeding by 10% the greatest previous shipment—that of 1923—the 1925 movement of California spring lambs to eastern markets, up to June 15, totaled approximately 329,000, of which 254,000 were live animals and 75,000 dressed. The number shipped up to the middle of June last year was 200,000.

Average price to growers f. o. b. ranch on spring lambs at present is from \$12.00 to \$12.50 per cwt., as compared with \$10.50 to \$11.00 last year.

pared with \$10.50 to \$11.00 last year. The movement this year of California cattle to eastern markets is greater than last and about equal to the 1923 movement. Approximately 8,000 animals had been shipped June 15. Cattle prices in San Francisco markets are ruling higher than elsewhere, and are from \$1.00 to \$1.50 per cwt. higher than one year ago. Average price at market for good 1,200-lb. steers is between \$8.75 and \$9.00 per cwt., compared with a price of \$7.75 to \$8.00 last year at this time.

With feed conditions from 90% to 110% of normal over the state of California, live stock generally are fat and in excellent condition.

OIL

Week ended	Cal. Daily	Ingledwell
May 19	602,500 bbls.	13,000 bbls.
May 26	615,500 bbls.	23,500 bbls.
June 2	623,000 bbls.	33,000 bbls.
June 9	635,000 bbls.	45,000 bbls.

DRIED FRUIT

There has been a resumption of activity in the prune market. Approximately one third of the carry-over in hands of growers—which amounted to nearly 20,000 tons—had been moved by the first of June. Prune prices are ruling approximately 1½¢ per pound less than last year at this time. European demand is said to be quiet, for the reason that the continental crop will be a good one this year.

Prices on the new crop of dried apricots are up from 2¢ to 2½¢ per pound from last year's levels. A small tonnage of the new crop of dried peaches has been moved at prices approximately 1¢ per pound higher than one year ago.

SAN FRANCISCO—Tourist trade, which was of normal proportions during the month of May, reflected during the first two weeks of June the heavy summer bookings which were reported in the spring. Some of the largest hotels of the city are already at capacity, with no rooms vacant, and the majority of the big hostels have advance bookings for the balance of the summer, which indicate a capacity of trade. Summer tours are reported to be unusually heavy this season.

The summer months in northern California have become the largest of the year in tourist travel, even eclipsing the winter period, which until recent years marked the high tide of visitors in San Francisco.

RETAIL TRADE

The latest report of the Federal Reserve Bank of San Francisco shows an increase of 4.5% in retail trade in San Francisco for the month of May, as compared with May, 1924. That this increase is being carried into the first two weeks of June is indicated by reports from leading department stores.

BUILDING

San Francisco building permits issued during May totaled \$4,047,811, which is 25% less than May, 1924. The twelve other municipalities of the bay area also show a reduction, with a May total of \$3,702,540—11% below that of May, 1924.

Presenting Memorial Coins
To Confederate Veterans

PERHAPS the most impressive and touching ceremony in connection with the recent Encampment of Confederate Veterans at Dallas, Texas, was the presentation to their officers of the fifth, sixth and seventh memorial coins minted by Hollis N. Randolph, President of the Stone Mountain Confederate Monumental Association.

To the Veterans, these beautiful coins minted by the United States Government in their honor, have a

erected to Robert E. Lee and Stonewall Jackson could have possibly equalled in sentiment the gracious national tribute to these Southern leaders paid in the minting of these beautiful coins. Bearing the likenesses of these great leaders, enshrined in every Southern heart, as a price pocket piece of every Southerner, of every Veteran in whose veins flows Confederate blood, they will occupy an intimate place in the affections of our people, such

Colonel Hollis N. Randolph, president of the Stone Mountain Confederate Memorial Association, presents the fifth coin minted of the Confederate Memorial currency, to General James A. Thomas, Commander-in-Chief of the United Confederate Veterans. The first of these coins was given to the president of the United States.

double significance. Not only do they bear on their face the likenesses of their beloved leaders, Robert E. Lee and Stonewall Jackson, but by one of those strange coincidences, in which many are wont to see the hand of Providence, they were struck at the Mint on the birthday of Stonewall Jackson, January 21st. In presenting the fifth coin to General James A. Thomas, Commander-in-Chief of the Veterans, President Randolph declared: "No monument or statue which the Federal Government might have as would be possible to no other Memorial. "Lee died five years after Appomattox, his citizenship never having been restored, virtually a prisoner on parole. I like to think that through these coins the National Government has sought to restore that citizenship and has recognized that the valor and those many virtues which shine forth so transcendently in the life of Lee, are national heritages, worthy to be handed down from generation to generation."

THE MYSTERY OF THE EARLESS BEGGAR AND THE SLIPPERY SHOES

Sapient 2 of Padlock Foames, Defective.

Brew street, Kachew, was undergoing a signal honor, for, going over it in that slipping, rising step peculiar to persons afflicted with a deficiency in the cerebral operations, was none other than the great Padlock Foames. As the defective wended his aimless way he played lulling tunes on his harmonica. Snappy ones like: "Old Black Joe," "John Brown's Body," "My Home Among the Tombstones," etc., etc.

Suddenly, he stopped by an earless beggar who held up his hands pleadingly, while Padlock laughed in his face. "Please to help me to a bite to eat," he sobbed. "Why, my poor fellow, what is wrong?" asked Foames.

"Ah! my story is sad," moaned the beggar, "years ago I had ears, even as you have. Beautiful ears they were, everyone said so. Large and red so that they were easily seen, but—woe is me—I got married." The tears fell in torrents. Padlock, benefactor of the public moved him over near the curbing so that the moisture could drain off into the gutter. The man continued: "My wife must talk. She talked from morn till night. My beautiful ears were wearing out. Each day I noticed they were smaller and smaller—Ah! me!"

Padlock felt a lump in his throat—great lumps and little biscuits—he had swallowed his tobacco. The lament of the other kept on unabated. "And one morning I awoke to find my ears gone completely. I saw red. I forgot myself. Alas! I killed my wife's goldfish. I drowned him to death in a glass of lemonade. My wife half-murdered me, and turned me out to shift for myself. With my ears gone I could no longer follow my profession I was a clown in a circus, imagine a clown without ears to wiggle; so I had to take to begging. Please help me, sir?"

Padlock turned away to hide the sobs of laughter that welled unbidden from his interior. He turned back to find the beggar standing on his head, waving his legs and crying harder than ever. "I'm lost," he sobbed, "she has inverted me. Oh! what shall I do?"

"Indeed, this is a rank piece of villainy," said Padlock, as he turned the man right side up. Having straightened him up he released his hold, whereupon the beggar slipped upside down again.

Quoth Padlock: "I must needs start at the bottom. I will examine his soles." He did so. "What is this," he cried. "The soles of your shoes are glass. No wonder you can't stand up. Your wife has indeed got ever with you for the death of her goldfish. But, I will fix it for you." He removed a wad of gum from his mouth. This he distributed over the smooth surface making the shoes safe for preambulating.

"How can I thank you?" cried the poor fellow, kissing Padlock's necktie.

"Perfectly alright," dismissed Foames, "I'd been chewing that gum a week anyhow." And he left in a hurry.

The beggar started to move off, rejoicing in the recovery of his lost balance, only to find to his dismay that the gum held him fast so he could not move. And where he had been bad off, he was now worse off.

Next Week—Sapient 4, "The Missing Scarecrow."

Now Autos Go Sea-Riding

Naval Hupmobiles On Honolulu Docks Centre of Interest Among Personnel.

WHEN the United States Navy went to sea and preparations were made for the gigantic Hawaiian maneuvers, special permission was given to a limited number of officers and rated men to transport their automobiles to Hawaii and Australia.

Principally to be noticed among the motor cars strapped aboard battleships and even on several of the destroyers, were Hupmobiles.

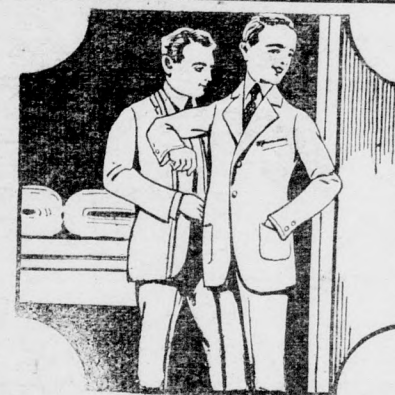

"Next to his ship, the Navy man's pride is in his motor car," once commented Captain Thomas T. Craven, in charge of the Naval Air Station, North Island, California.

Captain Craven drives a Hupmobile.

It has been said by officers of the

U.S.S. Concord, Light Cruiser Commanding the Destroyer Squadrons of the Scouting Fleet, Arriving In Honolulu.

United States Navy that the Hupmobile has been so popular with men in the Navy because like the Navy, "it is always ready." The sturdiness of the car, its certainty of performance, its absolute dependability—these are the qualities which have recommended Hupmobile to the Navy, officers and men alike.

IT WILL FIT TO PERFECTION

If we measure you for that new suit. You can select from our fine line of imported and domestic suitings and have the garments cut and finished in any style. Yet our prices are little more than for ordinary ready-mades.

Buy across the Counter

WHEN you buy across the counter in the stores of this town, you are using good business judgment. Why? There are many reasons, but one of the most important is this:

You can buy what you want at the price you wish to pay! You are not obliged to accept "something just as good," because you are in a position to compare values and make your own selections.

When you trade at home you are helping your friends to help you! And there is no finer thing in life than neighborly co-operation. It always pays—in happiness and satisfaction as well as dollars and cents.
